Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant argued Lakes et al does not disclose the notorious indicia of tampering in the first coating is different than the notorious indicia of tampering in the second coating. Examiner maintained Lakes discloses a substrate (12) with a color forming composition layer (14) and a toner adhesion enhancing coating (16) comprising insulating material (15) (Figure 1) where, in column 5, lines 56-59, Lakes discloses the insulating material, which is comprised within the toner adhesion enhancing coating, is removed by vigorously rubbing the material. If the insulating material of the toner adhesion enhancing coating is removed by vigorous rubbing, this provides a separate indicia of tampering from the color forming composition layer (coating that is sensitive to a solvent) .
